SIRENA YACHTS WORLD DEBUT

AT YACHTS MIAMI BEACH

Sirena 56

Sirena 64

Sirena Yachts - the all new Sirena Marine motor-yacht brand had the world premiere of Sirena 64 and Sirena 56 at the Yacht Miami Beach show. This shipyard's new production will compete in the modern-classic semi displacement GRP motor yacht market starting from 56 feet to 100+ft.

The first two models, the 64 and the smaller 56 were designed by two of the best designers on the international scene: Frers Naval Architecture & Engineering for naval architecture exterior design and engineering and Spadolini Design Studio for interior design.

The main features of the all-new Sirena 64 motor-yacht are:

- Unparalleled exterior and interior spaces and comfortable livability
- Fuel and water capacity designed to really offer "real" Long Range cruises
- Consumption efficiency (20% more efficient than direct competitors)
- Class A design gives high seaworthiness at all sea conditions and efficient hull guarantees max. high speeds

NAVAL ARCHITECTURE OVERVIEW

"For Sirena 64" - says German Frers in charge of the naval architecture exterior design and engineering- "there are three optional interior layouts of generous volume for serious world family cruising in great comfort including large glass windows for a good view to the sea and plenty of natural light. The hull design was developed in depth, including testing of three families of models at the Wolfson Unit towing tank facility in Southampton (UK). In addition, sea keeping tests were conducted on a self propelled 1/3 scale model of the hull".

It's a pleasant, sea conscious, low drag canoe body capable of running at high speeds or cruising in semi-displacement, low fuel consumption mode. The hull stability is well matched to the needs of the gyroscopic stabilizers to insure cruising or anchoring in great comfort.

EXTERIORS OVERVIEW

The first model of the range is Sirena 64 that, compared to others of similar size, features greater fuel and water capacity together with a 2 x CAT C12.9 - 850Hp that have higher maximum speeds up to 27 knots. The shipyard will provide the option of more powerful engines as well. Sirena 64 is characterized by a 38sqm flybridge where owners can enjoy the amazing sea view and breathe clean air. The retractable hardtop lets owners/guests enjoy the flybridge even during difficult sun hours. The exterior area of Sirena Yacht 64 provides an 80-feet living area. Wide open view of the vast seascape fills the enormous living space of the boat.

The main features inside are a spacious main deck of approx. 52 sqm and larger cabins in the category. The master room in particular, with approx. 24 sqm, has the biggest suite on the market, both in term of surface and volumes. It has a full beam bathroom with separate washroom, toilet and shower areas.
